GitHub: https://github.com/Mohammad-shokin Mobile: +91-8209950190

SKILLS

Languages:	Python, C, C++, Java
Machine Learning:	Decision Trees, Random Forest, Logistic Regression, K-Means, PCA, SVM
Libraries:	NumPy, Pandas, Scikit-learn, Matplotlib, Seaborn
Tools & Technologies:	HTML, CSS, Git, Anaconda, WordPress
Soft Skills:	Analytical thinking, Problem Solving, Teamwork, Adaptability

TRAINING

Mastering Data Structures and Algorithm(LPU) - Link **June 2025 – July 2025**

- Completed a 6-week Data Structures and Algorithms training. Applied core concepts like arrays, linked lists, stacks, queues, trees, graphs, sorting, searching, recursion, and dynamic programming through hands-on practice and real-time project implementation.
- Implemented and utilized DSA concepts to build efficient solutions for practical problems, focusing on optimizing time and space complexity.
- Enhanced problem-solving and logical thinking skills by solving diverse coding challenges and debugging real-world scenarios. **Tech Stack:** C, Data Structures, Algorithms.

PROJECTS

Ova Care-AI - Link **February 2026**

- Developing and comparing Machine Learning models including Logistic Regression and Random Forest for PCOD risk classification using structured health and lifestyle datasets.
- Building a data preprocessing pipeline to clean and transform raw data, handling missing values and outliers to generate model-ready features.
- Designing a rule-based recommendation system to generate personalized diet and exercise plans based on predicted risk levels. **Tech Stack:** Python, Scikit-learn, Pandas, Machine Learning, Data Cleaning, Data Preprocessing.

Smart Parking Management System - Link **Feb 2025 – May 2025**

- Designed and implemented a Smart Parking analysis system using IoT-based sensor data and ML classification algorithms (Decision Tree, Logistic Regression) to predict parking slot availability.
- Performed data preprocessing, visualization, and feature engineering on parking datasets to improve prediction performance and extract meaningful insights.
- Evaluated models using accuracy, precision, recall, and confusion matrix, ensuring reliable and interpretable results. **Tech Stack:** Python, Google Colab, Pandas, NumPy, Scikit-learn, Matplotlib.

CERTIFICATES

- ChatGPT-4 Prompt Engineering ChatGPT, Generative AI & LLM– Infosys. **Sept 2025**
- Computational Theory: Language Principle & Finite Automata Theory– Infosys **Aug 2025**
- Building Generative AI Apps and Solutions with No-Code Tools – Infosys. **Aug 2025**
- Social Networks – NPTEL. **Oct 2025**
- Introduction to Hardware and Operating Systems – Coursera **Link**. **Nov 2024**
- Computer communication specialization – Coursera **Link**. **Sept 2024**

COMMUNITY ENGAGEMENT / SOCIAL IMPACT

NGO CDP Project – Importance of Computer Knowledge **July 2024**

- Conducted a community-based project under NGO supervision to promote computer literacy, delivering sessions on basic digital skills and contributing 32+ hours to enhance students' practical technology awareness.

EXTRA-CURRICULAR ACTIVITIES & VOLUNTEERING

- Volunteered at **Sunburn 2023** in collaboration with Coding Ninjas LPU, assisting in large-scale event coordination and management.
- Contributed to **Binary Blitz (Mar 2024)**, supporting operations and coordination during a 24-hours technical hackathon.
- Assisted in organizing **GDSC WOW Punjab (Apr 2024)**, managing event logistics for Google Developers Student Club activities.
- Actively participated in organizing and coordinating major university events including **Rang Manch, Matrix 2024, Honda Freshface, Webistan, Tech Blitz, and Binary Blitz 2.0**.

EDUCATION

Lovely Professional University — Punjab, India
Bachelor of Technology - Computer Science and Engineering — August 2023 – Present
Vidhur Navodhay senior sec. School — Kota, Rajasthan
Intermediate - PCM; Percentage: 62 — March 2022 – May 2023
Ambika Bal Vidhya Mandir — Baran, Rajasthan
Matriculation; Percentage: 71 — March 2019 – March 2020
